Active Asset Allocation with passive implementation - 'Risk First' Growth

The Alpha Beta Model Portfolios are designed to provide low-cost, 'Risk First' managed investments that take advantage of the cost and style benefits associated with passive instruments blended with active managed funds coupled with active asset allocation.

Active Asset Allocation

According to the CFA Institute 91.5% of a portfolio's return is delivered by asset allocation. At Alpha Beta Partners, our asset allocation views are forward looking, thus differentiating us to the majority of our competition. We deploy sound judgment built up over many years of investment management experience and leverage the latest financial technology to assist our implementation techniques.

Our investment philosophy

Our starting point is to understand the key drivers of economic growth around the world and to project a forward view, rather than simply looking backwards to the past. Our active investment approach encompasses rigorous asset allocation which will adapt to market conditions over time. Portfolios are monitored constantly to ensure their performance meets our expectations and that risks are understood and well managed.

At the core of our investment philosophy are these principles:

- A diversified approach to asset allocation and a focus upon liquidity.
- Thorough research leading to the identification of active and passive investment strategies which when blended, provide attractive returns designed to meet your clients' financial plan.
- Dynamic asset allocation and a truly global approach to investment.
- 'Risk First' approach to identify and help avoid the impact of market downturns and to consistently align with your clients' stated risk appetite.

Independent Research

All passive and active investments are not the same, so Alpha Beta undertakes extensive research to find best-fit investments for our Core Plus Portfolios. We make sure that we replicate the relevant indices as closely as possible to minimise tracking-error, cost and we ensure all investments are physically backed. In addition, we work hard to identify high alpha active managers to satellite positions that can add further growth potential.

Costs

Whilst performance for any investment is uncertain, costs are not. Low turnover and low overheads mean that a passive investment's performance should not be eaten away by a high expense ratio.

We research the investment universe to find the most effective, lowest-cost options that fit each portfolio's needs suitably and responsibly, whilst offering a convenient way to give all types of investors exposure to specific market segments.

Key Facts

- The Alpha Beta 'Risk First' investment process will ensure clients and advisers are protected from undue market movements. Where market volatility breaches agreed risk bands, the Alpha Beta investment team will rebalance portfolios to ensure the agreed portfolio risk framework is maintained for your clients.
- We believe asset allocation is the principal driver of returns. Delivering this core aspect cost effectively and efficiently is crucial. Selecting high alpha fund managers to satellite positions can add further growth potential.
- Investment expertise – offering competitive access to our experienced investment management across a broad range of strategies.
- Institutional quality investment processes rarely available to the retail client.
- Liquidity – the ability and flexibility to change/ sell at any time.
- Attractive 'overall cost' relative to the market.

Core Plus Portfolios

The Core Plus Range invests in a choice of 6 Risk Rated portfolios, of predominantly passive instruments but with a blend of active funds where appropriate that can add value. The portfolios have been awarded the highest 5 Star Rating and 5 Diamond Rating from Defaqto.

The Alpha Beta Core Range comprises of 6 Risk Rated portfolios: AB1 – AB6

Equity Fixed Income Cash

PORTFOLIOS	OBJECTIVE	DEFAQTO RISK RATING	ASSET ALLOCATION
